VALUE Rubrics Scoring Worksheet

To score with a VALUE rubric:

- Label the dimensions of the rubric (i.e., each row) with A, B, C, and so on down the left-hand side.
- Use the 4, 3, 2, and 1 already printed across the top of the rubric for each column.
- Combine the letters and numbers to create a code that represents each cell/performance descriptor, such as A4, B3, C2, etc.
- When scoring, write the corresponding code in the margin of the student artifact next to the evidence that supports a specific level of performance for each dimension.
- After reading the artifact and writing codes in the margins, review your margin codes and determine the best score for each of the dimensions of the rubric. Remember that ALL behaviors in a performance descriptor must be present in order to select that score.

This form is designed to help facilitate your thought process as you follow this approach.

Circle one score for **Dimension One**: 4 3 2 1 0
Where in the artifact is this level of performance? (Please provide page and paragraph location.)

Circle one score for **Dimension Two**: 4 3 2 1 0
Where in the artifact is this level of performance? (Please provide page and paragraph location.)

Circle one score for **Dimension Three**: 4 3 2 1 0
Where in the artifact is this level of performance? (Please provide page and paragraph location.)

Circle one score for **Dimension Four**: 4 3 2 1 0
Where in the artifact is this level of performance? (Please provide page and paragraph location.)

Circle one score for **Dimension Five**: 4 3 2 1 0
Where in the artifact is this level of performance? (Please provide page and paragraph location.)

If applicable: Circle one score for **Dimension Six**: 4 3 2 1 0
Where in the artifact is this level of performance? (Please provide page and paragraph location.)
